

More Evidence of Crimes and Frauds and of Criminal Intent which support the statements made in the Report 'Scientific Expert Report on the COVID-19 Epidemic Response in Ireland' handed into Kevin Street Garda (police) station in Dublin in May 2021

January 2022

Criminal intent to commit crimes via dangerous and experimental covid vaccines. The same crimes committed in several countries including in Ireland.

The following video interview of medical doctors and scientists by the legal team of Reiner Fuellmich, a highly experienced lawyer qualified in the USA and in Europe, provides strong evidence of criminal intent and criminal premeditation to use dangerous and experimental vaccines worldwide, including in Ireland. Dr. Wolfgang Wodarg, a top German medical doctor and scientist provides data and graphs to support the fact that vaccine companies used different batches of covid vaccines at different times, some were dangerous batches which caused injuries, disabilities and deaths and some were harmless batches which did no harm. There is also evidence of coordination between vaccine companies in the giving of these dangerous batches to people. This has been done without the informed consent of the vaccinated people which is a criminal offence in many countries including Ireland. Tens of thousands of people have died or been injured by these vaccine experiments which is also a criminal offence involving charges of murder, manslaughter, assault causing serious harm and poisoning. Criminal intent is proven by the fact that vaccine companies have been using different batches of vaccines some of which they know to be dangerous and deadly and others which are harmless, and they know of the high number of deaths, injuries and disabilities and yet persist in their crimes. This evidence will be presented before the German criminal courts by the legal team of Reiner Fuellmich. This video and evidence will also be presented in the International Criminal Court. And presented in criminal courts in European countries and North America, including in Ireland.

First time detection of the vaccine spike protein in a person who died after covid vaccination – Important Information for all pathologists and all autopsies of dead vaccinated people

The suspicion that the spike protein formed in the body as a result of the "vaccination" against Covid-19 could be responsible for the pathologically observed inflammations and lesions of vessels has now been confirmed immunohistologically for the first time.

The pathologists Prof. Dr. Arne Burkhardt and Prof. Dr. Walter Lang and their team have succeeded in reliably detecting the vaccine spike protein in the vessels of a person who died 4 months after "vaccination" and who had vascular lesions and also vaccine-induced myocarditis. Detection was successful using an antibody specific for the spike protein by conventional immunohistochemistry on the tissue sections.

The described detection method can be applied to all organ and cell damage in which conspicuous pathological findings are found after "vaccination" against Covid-19. From this follows: For ethical, legal and scientific reasons, all histopathological examinations in connection with damage due to "vaccination" against Covid-19 must be accompanied with this method with immediate effect.

More Evidence that covid vaccines and Lockdowns / Business Closures are NOT stopping covid infections and hospitalisations and vaccines are losing effectiveness and reaching minus figures for effectiveness. More corroborating evidence that vaccinations and boosters are increasing covid19 cases via triggering false positives on PCR tests.

Higher number of covid19 cases in December 2021 than in all of 2020 and 2021, even though 92% of population are covid vaccinated ! And this rise continued into January 2022. Statistics chart above shows a big Increase in covid19 cases after the introduction of vaccine boosters, vaccines for children, teenagers and young adults, the colds and flu season, and after the introduction of new social restrictions and lockdowns in Ireland and Britain on December 20th 2021. Why the sudden surge in covid19 cases in December 2021 and January 2022, when 92% of the population were vaccinated ?

HSE and NPHET and Dept. of Health are not measuring or refusing to measure the False Positives triggered by the covid vaccines and boosters, and by the colds and flus in Winter and pre-existing illnesses among the already ill or very elderly. And not measuring or admitting to the ineffectiveness of covid vaccines against new covid variants. The evidence provided in our books of evidence and from government reports and scientific research worldwide showed covid vaccinated people have the highest

percentage of covid19 and variant infections in Ireland and other highly vaccinated countries. And scientific evidence is showing that covid19 vaccines and boosters are creating new mutations and new variants and driving this whole covid19 pandemic worldwide and prolonging it.

The CDC has discontinued PCR tests for covid19 since December 31st 2021 due to the high rate of False Positives, yet the HSE, NPHET and Irish Dept. of Health still use this PCR fraud in 2022. And they persist in pushing dangerous and ineffective covid vaccines and boosters.

The promotion of fear, panic and paranoia has replaced science, medicine, accountable government, and data analysis in Ireland. More evidence of criminal negligence and misconduct in public office. This corroborates and verifies the evidence we have supplied to the Irish police, (the gardai) and DPP since May 2021 and more evidence of these crimes and frauds for the criminal courts.

- **Lies and Criminal Deception**

In early Summer 2021, the CDC and the Irish government and NPHET claimed that the vaccines were 95% or more effective and they opened up the economy and claimed a return to normal for the vaccinated. And travel was restored for the vaccinated. This was based on lies and deception as proven by subsequent events. Despite 92% of the Irish population being vaccinated in Ireland in October 2021, the government did a u-turn and re-introduced new social restrictions at the end of October 2021 which affected both the vaccinated and unvaccinated. In December 2021, the Irish government and NPHET claimed the vaccines were ineffective against Delta and Omicron variants and they implemented partial lockdowns and other social restrictions for the vaccinated and unvaccinated. In January 2022, the Irish government did another u-turn, despite the vaccines being declared ineffective they have allowed international travel for vaccinated people despite the widely acknowledged fact that vaccinated people can get the covid19 virus and spread it to others. Evidence shows vaccinated people have a higher rate of covid19 infections and hospitalisations than unvaccinated people and they have been given the right to travel and spread the virus nationally and internationally. The booster which is the same as the vaccine is also being found to be ineffective

against Omicron yet the vaccinated are allowed by the Irish government to spread it widely. So the Irish government are breaking their own policies, guidelines, regulations and laws.

The Israeli government is on it's second booster, or fourth vaccine, in January 2022 and even that is beginning to lose effectiveness due to new variants and waning protection. And scientific evidence presented by top scientists and doctors worldwide continue to show that the vaccines and boosters are creating the new covid variants ; this is also in our prior books of evidence. The lies and criminal deception of the Irish government, NPHET, CMO, and HSE are obvious. The criminal intent here is to keep selling vaccines and boosters and profiteering from them while continuing to block and ban safe and effective medicines for covid19 since April 2020. And destroy the Irish economy and society in the process.

It's official, the Covid-19 vaccines, across the board, demonstrate negative efficacy.

I just ran the numbers of the latest data from England. Up to this point we've seen a decline in the effectiveness of the vaccines in preventing Sars-Cov-2 infection but we didn't have every age group showing a negative efficacy. Today, we do.

The latest data compiled from these two reports tells a completely different story to the one being told on MSM.

I don't like using relative risk reduction but it's the common metric being used throughout this *pandemic* to promote the vaccines so I'll use it here. Also, it makes no difference to the overall story: the vaccines are not only failing to prevent infection, but they are making you more vulnerable to infection.

[Share](#)

Figure 1 Relative risk reduction of Covid-19 infection after vaccination in England

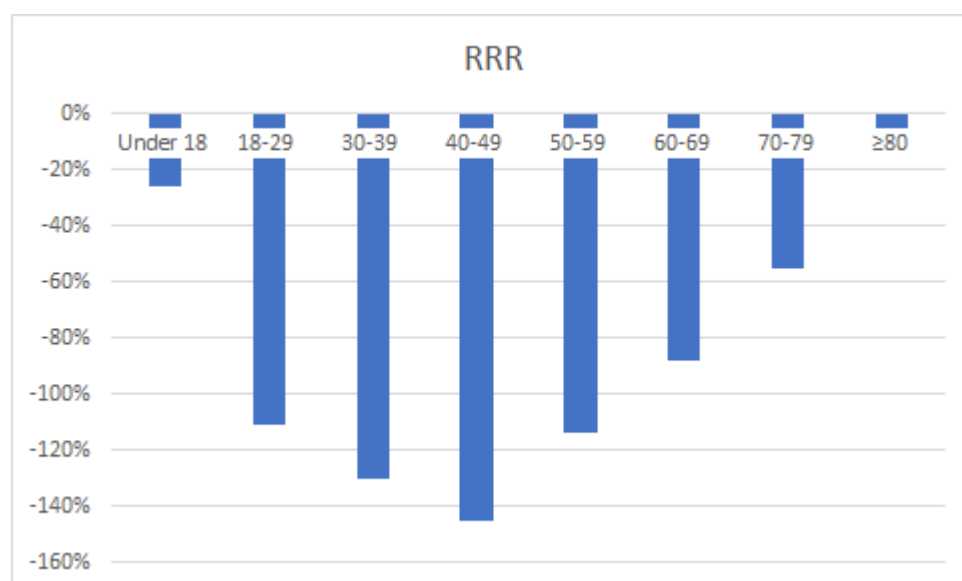

Fig.1 shows that not only does vaccination against Sars-Cov-2 infection not prevent infection but increases the risk of infection. All age groups demonstrate negative efficacy.

The vaccines are not only failing to prevent infection, but they are making you more vulnerable to infection.

In all age groups, as clearly shown in fig.1, Covid-19 vaccines are demonstrating negative efficacy. That means, the vaccinated are at greater risk of infection than the unvaccinated. For example, the vaccinated 40 -49 yrs age group is at an increased relative risk of infection compared to the same unvaccinated age group by over 140%.

[Share](#)

According to Biden and every other *independent* world leader, you are at great risk by not being vaccinated. Biden told the public not to be alarmed, unless if you are unvaccinated, then there is "some reason to be alarmed."

[Source](#)

They make all sorts of claims regarding the unvaccinated overcrowding hospitals; severe illness & death. We have dealt with those in prior articles. But what is very clear now, if you want to reduce your chance of getting infected with Sars-Cov-2, don't wear a mask; don't listen to Biden; and don't get vaccinated...

Are the covid vaccines and boosters really safe ? More corroborating evidence exposing the lies of NPHET, Tony Holohan, the HSE, Minister for Health and Dept. of Health. Lies which have led to many deaths, injuries and disabilities.

More Corroboration of our Evidence on Web site at <https://dailyexpose.uk/2022/01/15/new-study-shows-an-increase-in-deaths-in-145-countries-after-covid-vaccines-were-introduced%e2%80%8b/> cited below:

New Study Shows an Increase In Deaths In 145 Countries After COVID Vaccines Were Introduced.

A ground-breaking scientific [study](#) has found that countries recording the fewest COVID-19 deaths in 2020 before vaccinations, experienced “hundreds or thousands of percentage increases in total deaths” after COVID-19 vaccinations were introduced.

The study conducted by K. Beattie, of the University of Alberta, found that 89.84% of the 145 countries experienced a negative impact after COVID-19 vaccinations were made available.

This led to the conclusion that “The statistically significant and overwhelmingly positive causal impact after vaccine deployment [...] on the total deaths and total cases per million should be highly worrisome for policymakers ([source](#)).

Interestingly, it has been said that this study was made available before the U.S. Supreme Court hearing that blocked the OSHA vaccine or test mandate as the study found that in the United States, COVID-19 vaccinations account for an increased transmission rate of 38% and a 31% increase in death rate, it would have been criminal had the case not voted against the mandate rule.

The Study

The researcher of the study “[*Worldwide Bayesian Causal Impact Analysis of Vaccine Administration on Deaths and Cases Associated with COVID-19: A Big Data Analysis of 145 Countries*](#),” said that “policymakers and mainstream news anchors have promised the public that the COVID19 vaccine rollout worldwide would reduce symptoms, and thereby cases and deaths associated with COVID-19”.

Due to the vaccine rollout still being in progress a large amount of public data was available enabling analysis to be undertaken to determine whether the public policy treatment produced the desired effect. In order to do so, the researcher implemented a Bayesian causal analysis, comparing both pre-and post-treatment periods.

The Findings

According to Beattie, the results indicated that the treatment (vaccine administration) has a strong and statistically significant propensity to causally increase the values in either y1 [variable chosen for deaths per million] or y2 [variable chosen for cases per million] over and above what would have been expected with no treatment.

y1 showed an increase/decrease ratio of (+115/-13), which means 89.84% of statistically significant countries showed an increase in total deaths per million associated with COVID-19 due directly to the causal impact of treatment initiation [vaccines].

y2 showed an increase/decrease ratio of (+105/-16) which means 86.78% of statistically significant countries showed an increase in total cases per million of COVID-19 due directly to the causal impact of treatment initiation”([source](#)).

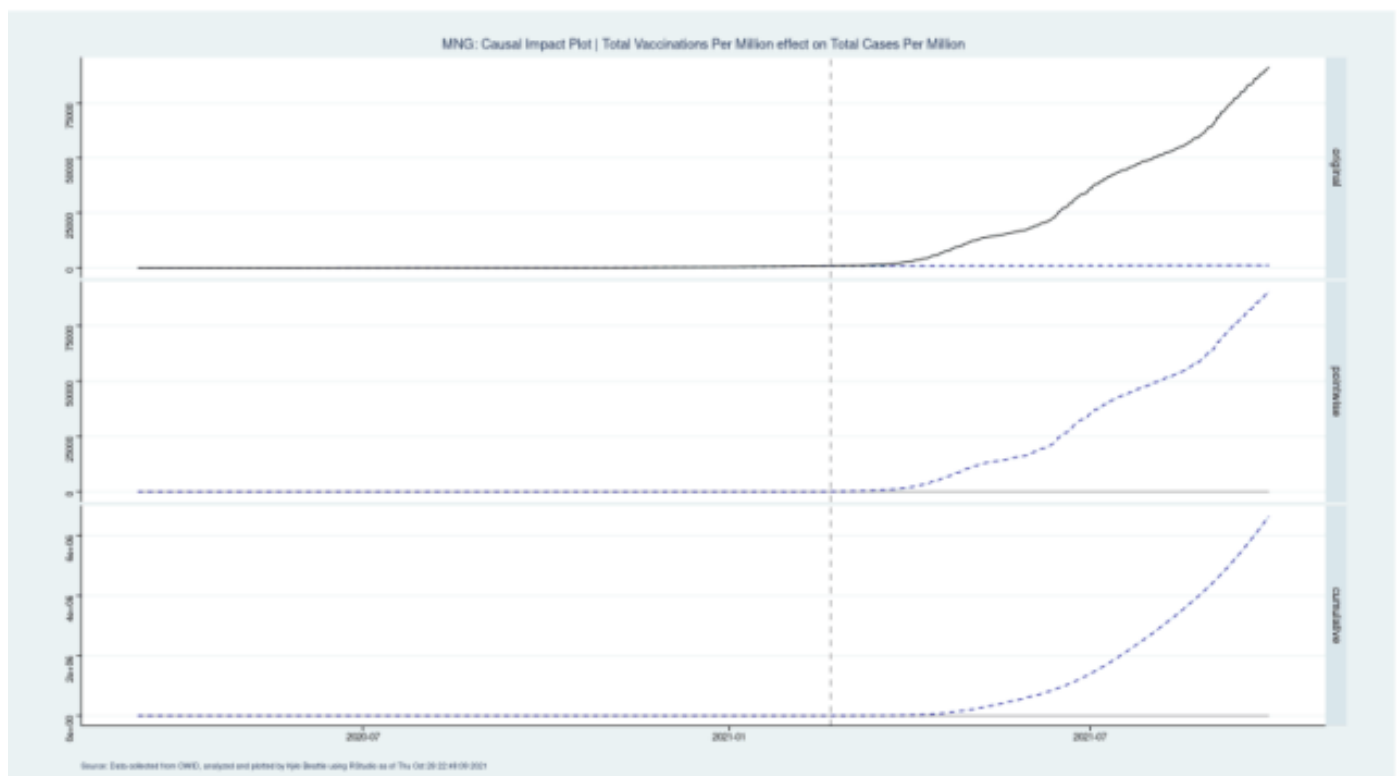

8 Results

After eliminating all results from countries with $p > 0.05$, there were 128 countries for $y1$ and 103 countries for $y2$ to analyze in this fashion (avg. $p\text{-value} < 0.004$), 145 unique countries in total. Results indicate that the *treatment* (vaccine administration) has a strong and statistically significant propensity to causally increase the values in either $y1$ or $y2$ over and above what would have been expected with no treatment. $y1$ showed an increase/decrease ratio of (+115/-13), which means 89.84% of statistically significant countries showed an increase in total deaths per million associated with COVID-19 due directly to the causal impact of treatment initiation. $y2$ showed an increase/decrease ratio of (+105/-16) which means 86.78% of statistically significant countries showed an increase in total cases per million of COVID-19 due directly to the causal impact of treatment initiation. Causal impacts of the treatment on $y1$ ranges from -19% to +19015% with an average causal impact of +463.13%. Causal impacts of the treatment on $y2$ ranges from -46% to +12240% with an average causal impact of +260.88%. Hypothesis 1 Null can be rejected for a large majority of countries.

Countries with Less COVID Deaths in 2020 Fared Worse

The study also found that it was countries such as Thailand, Vietnam, Mongolia, Taiwan, etc that had experienced few COVID-19 deaths in the year 2020 were the ones who appeared to have fared the worst of all countries after vaccine administration.

Mongolia: +3391% Vaccine Causal Impact on Total Cases Per Million

Mongolia is one of the countries which fared the worst.

"The causal impact results from vaccine administration seen in these countries [is] hundreds or thousands of percentage increases in total deaths and cases per million," according to the researchers.

"We can be most statistically confident in due to the direct increase of COVID-19 associated deaths and cases after vaccine administration, where prior to vaccine administration there were few or none."

Countries with Higher Deaths Associated with COVID

The researcher observed that many countries that reported high cases and deaths associated with COVID-19 during 2020 and early 2021 and assumed that they had appeared to have largely achieved natural immunity by late spring of 2021 in the Northern Hemisphere, which is why many of their trend lines go flat for a time.

Unfortunately, once the vaccine administration started for the general population, or shortly thereafter, those trend lines began to increase again in many countries, and unnaturally so in the middle or towards the end of summer in the Northern hemisphere or in countries where previously there had been very few if any cases or deaths.

Normally, seasonal die-off from pneumonia, influenza, or COVID-19 is in the winter, so this spike that appears in many countries after vaccine administration at this time of the year or in countries with no previous outbreaks is highly suspect as not being a natural trend but rather vaccine-induced.

Although attributing the results to the waning effect of COVID-19 vaccine protection and the amount of “breakthrough” cases, the researcher argues that together with the “overwhelming” and “historically unprecedented” quantity of reports of vaccine adverse events in the [Vaccine Adverse Event Reporting System](#) (VAERS), (over 16,000 reported deaths at the time of writing) suggests a “highly untested vaccine”

The Warning To Policy Makers

The researcher also made a particularly specific warning to those who create policy and impose mandates due to the fact that their study verifies the correlation between vaccinations and a “substantial increase in death.” Vaccine mandates were predictably criticised, Beattie states that “If they ever were ethical, which this author disagrees with strongly based on scientific, medical, and research ethics that regard the patient rights to informed consent and non-prejudicial refusal of treatment or experimentation as iterated and agreed to under the Nuremberg Code (Code 1998) and the Human Rights Declaration on Bioethics, as inalienable, essential, and non-negotiable, vaccine mandates under these conditions and results are beyond unethical at this point.”

“They are clearly discriminatory and likely criminal, a determination courts and lawyers will ultimately decide.” The author has generously shared all results, data, plots, and R code included in this study for the easy replication by others.:

Note: these figures vary internationally. Some countries implement early treatment for covid19 using safe and effective medicines for covid19 available since March 2020, and some other countries refused to do this and blocked these medicines. Ireland belongs to those who refused to do early treatment and use these safe and effective medicines. And high rates of false positives for covid19 also skew these statistics. Myocarditis Tops List of COVID Vaccine Injuries Among 12- to 17-Year-Olds, VAERS Data Show

VAERS data released Friday by the Centers for Disease Control and Prevention included a total of 1,033,994 reports of adverse events from all age groups following COVID vaccines, including 21,745 deaths and 170,446 serious injuries between Dec. 14, 2020, and Jan. 7, 2022.

- **Joseph Mercola: Do More Children Die From the COVID Shot Than From COVID?**

https://www.theepochtimes.com/more-children-die-from-the-covid-shot-than-from-covid-4215381.html?utm_source=ref_share&utm_campaign=copy&rs=SHRQLJLC&

‘ The video above features **Collette Martin**, a practicing nurse who [testified](#) before a Louisiana Health and Welfare Committee hearing December 6, 2021. Martin claims she and her colleagues have witnessed “terrifying” reactions to the COVID shots among children—including blood clots, heart attacks, encephalopathy and arrhythmias—yet their concerns are simply dismissed.....

In early September 2021, Tracy Beth Hoeg and colleagues posted an analysis of VAERS data on the preprint server medRxiv, showing that more than 86 percent of the children aged 12 to 17 who report symptoms of myocarditis were severe enough to require hospitalization.

Cases of myocarditis explode after the second shot, Hoeg found, and disproportionately affect boys. A full 90 percent of post-jab myocarditis reports are males, and 85 percent of reports occurred after the second dose.....

“The estimated incidence of CAEs [cardiac adverse events] among boys aged 12-15 years following the second dose was 162 per million; the incidence among boys aged 16-17 years was 94 per million. The estimated incidence of CAEs among girls was 13 per million in both age groups.” ‘

We ask for nurse Collette Martin and Dr. Joseph Mercola to be subpoenaed into the Irish courts to provide testimony and evidence.

As of December 17, 2021, looking only at U.S. reports and excluding the international ones, VAERS had received:

- 308 cases of myocarditis among 18-year-olds
- 252 cases among 17-year-olds
- 226 cases in 16-year-olds
- 256 cases in 15-year-olds
- 193 in 14-year-olds
- 132 in 13-year-olds
- 108 in 12-year-olds

In total, that’s 1,475 cases of myocarditis in teens aged 18 and younger—five times the background rate. And again, this does not take into account the underreporting rate, which has been calculated to be anywhere from five to 40.

- A warning to the general public in all nations including Ireland from Dr. Robert Malone, a top medical doctor and research scientist and patent holder in the USA and inventor of the mRNA technology used in the covid vaccines and boosters.

From web site: <https://dailyexpose.uk/2022/01/16/because-of-his-warning-to-protect-our-children-dr-malone-was-banned-across-all-social-media/>

Because of His Warning To “Protect Our Children,” Dr. Malone Was Banned Across All Social Media

By [Patricia Harrity](#) on [January 16, 2022](#) • ([4 Comments](#))

In an attempt to warn parents of the risks of taking the gene therapy jab, internationally recognised scientist/physician Dr. Robert Malone, the original inventor of mRNA vaccination as a technology, shared a video message which resulted in him being banned across all social media. Although it is hard to comprehend why any parent would still be in favour of their child receiving the jab due to the known health risks, it is important to share Dr Malone’s expert warning just in case.

Who is Robert Malone?

It is important to know exactly “who” this “expert” is if you do not already, as Malone, like many other esteemed scientists, has been accused of being a “conspiracy theorist” and “[pro-anti-vaxxer](#)”, yet he himself has admitted to having had the COVID vaccine.

Not only that but has spent his career developing vaccinations including the mRNA, DNA vaccination, and multiple non-viral DNA and RNA/mRNA platform delivery technologies. He also holds numerous fundamental domestic and foreign patents in the fields of gene delivery, delivery formulations, and vaccines.

Dr. Robert Malone received his medical degree from the Northwestern Feinberg School of Medicine, completed the Harvard Medical School fellowship as a global clinical research scholar was scientifically trained at the University of California at Davis, the University of California at San Diego, and at the Salk Institute Molecular Biology and Virology laboratories. He also served as an assistant and associate professor of pathology and surgery at the University of California at Davis, the University of Maryland, and the Armed Forces University of the Health Sciences.

He has approximately 100 scientific publications his work has over 12,000 citations giving him an “outstanding” impact factor rating” on Google Scholar. He has sat on or served as chairperson on [United States Department of Health and Human Services](#) and [United States Department of Defense](#) committees and has been invited to speak at over 50 conferences, and currently sits as a non-voting member on the NIH ACTIV committee, which is tasked with managing clinical research for a variety of drug and antibody treatments for COVID-19.

The following is Robert Malone’s message from his video written verbatim.

Dr Malone’s Warning

Reading from a prepared script which he says is to ensure he got “every single word and scientific fact correct” Malone begins: “My name is Robert Malone, I am a physician and a scientist, but more importantly, I am a father and grandfather”.

I stand by this statement with a career dedicated to vaccine research and development, I am vaccinated for COVID and I am generally pro-vaccination. I have devoted my entire career to developing safe and effective ways to prevent and treat infectious diseases.

An Irreversible Decision

Before you inject your child, a decision that is irreversible, I wanted to let you know the scientific facts about this genetic vaccine that is based on the RNA vaccine technology that I created. There are three main issues that parents need to understand before they take this irrevocable decision. The first is a viral gene will be injected into your parent cells, this gene forces your child’s body to make toxic spike proteins. These proteins often cause permanent damage in children’s critical organs. These organs include their brain and nervous system, their heart and blood vessels including blood clots, their reproductive system and most importantly, this vaccine can trigger fundamental changes to their immune system.

The most alarming point about this is, is that once these damages have occurred they are irreparable, they cannot be reversed. You can’t fix the lesions within their brains, you cannot repair heart tissues scarring, you cannot repair a genetically reset immune system and this vaccine can cause reproductive damage that could affect future generations of your family.

The second thing you need to know is about the fact that this novel technology has not been adequately tested, we need at least five years of testing and research before we can really understand the risks associated with this new technology. The harms and risks from new medicines often become revealed many years later. I ask you to ask yourself as a fellow parent if you want your child to be part of the most radical experiment in human history.

One final point, the reason they are giving you to vaccinate your child is a lie, your children represent no danger to their parents or grandparents, actually, the opposite their immunity after getting COVID is critical to save their family if not the world from this disease.

Finally, in summary, there's no benefit for your children or your family to be vaccinating your children against the small risks of the virus, given the known health risks of the vaccine that is apparent you and your children may have to live with for the rest of your lives. The risk-benefit analysis is not even close with this vaccine for children. As a parent and grandparent, my strong recommendation to you is to resist and fight to protect your children" It should worry everyone that an expert in the field such as Robert Malone would have such an important message censored, especially when it is a warning to protect the children.

- **HSE document promoting covid vaccines for children aged 5 -11 is flawed and contains errors and lies and constitutes reckless endangerment of children and false advertising**

The HSE document titled 'Comirnaty (Pfizer/BioNTech) vaccine for children aged 5 to 11 : Important information for parents and guardians'. The document is available on the HSE web site and also on www.data-analytica.org/hse-lies.pdf . They falsely claim that children are at risk of dying from covid19, this is false. The CSO statistics show that no child in Ireland died of covid19 since March 2020. **The Infection Fatality Rate for children aged 0 - 14 years old in Ireland was zero since March 2020.** The latest Infection Fatality Rate for covid19 for children internationally was 0.0013%. This is tiny and insignificant and similar to seasonal colds and flu which we have had for hundreds of years.

They claim the covid vaccines are safe for children and that side effects are rare, this is false. They also falsely claim that covid vaccine benefits outweigh the risks. The evidence from around the world clearly show that covid vaccines cause a high rate of deaths or illnesses or disabilities in children including myocarditis, pericarditis, heart attacks, strokes, sudden deaths, dangerous clots, bleeds in the brain and other body parts etc. This risk is many times greater than normal or background rates for children. And the risk from this vaccine is great than the risk of all other vaccines combined together over many years. And new evidence from the Pfizer trial documents and other scientific reports show that the covid vaccines increase All Cause Mortality. **The risk to children is much higher than zero and**

zero is the covid Infection Fatality Rate for Ireland and much higher than 0.0013 the Infection Fatality Rate for children internationally. This is omitted from the HSE document. They state the vaccine is effective and this is false. Evidence from around the world shows that the vaccine is ineffective especially after 8 weeks. Covid19 variants are able to defeat this vaccine. Furthermore, evidence is showing that the vaccines and boosters are causing the virus to mutate and create new variants.

They falsely claim that the vaccine has gone through full clinical trials and safety checks. Medium term safety and long term safety has not been determined for the vaccine due to its rushed development and the short term effects are proving deadly and dangerous according to evidence from, around the world. The document does not mention any prior test for allergies and allergic reactions which are common in Irish children. The HSE document does not detail the ingredients of the vaccines, the risks in terms of deaths, illnesses and disabilities caused by the covid vaccine and the short term, medium term and long term effects of it, and this means it blocks or undermines the informed consent of the parents or guardians of the children. This HSE document directly undermines informed consent and is a criminal document which is putting the lives of children at serious risk.

We call for the arrest and criminal prosecution of the people responsible for creating and distributing this HSE document.

The chairperson of NIAC has repeated these same lies and this has been published in the press and media - 'Niac chair urges Covid vaccine for children to allow return to 'normal childhood'

<https://www.breakingnews.ie/ireland/niac-chair-urges-covid-vaccine-for-children-to-allow-return-to-normal-childhood-1240120.html>

We call for the arrest and criminal prosecution of Mrs. Karina Butler as she is endangering the lives of many Irish children.

Prior books of evidence and official statistics clearly show that children aged 0 - 18 have not died of covid19 in Ireland and have zero or very tiny risk (less than 0.0003%) chance of dying from covid19 while they have a high risk of dying or getting serious illnesses or disabilities from the covid vaccines and boosters. The cost-benefit analysis shows the cost is too high for children as it increases their risk of death, illnesses, and disabilities over a thousand fold. This is reckless endangerment of children in addition to and murder or manslaughter or assault causing serious bodily harm to children.

Deaths - Ireland - 2021 rev.11/01/2022

Sources: Kieran Morrissey and RIP.ie and General Registration Office, Ireland

Deaths registered in GRO and occurring in year received from GRO by email 05/10/2021 to KM

Year	Deaths Occuring	Population x 1,000	Death Rate
2015	30,816	4,688	6.57
2016	31,363	4,740	6.62
2017	31,141	4,793	6.50

Excess in 2020	592	Excess =	1.85%

Deaths in 2020 31,940

Deaths in 2021 34,814

Increase in Deaths in 2021 = 2,874. A 9% increase on 2020. This is a big increase in deaths in one year and the highest in over 30 years.

Excess Mortality in 2021 = **3,466**. This is 9.9% of total deaths in 2021. Excess Mortality in 2020 was **592**.

Irish Population = 5.11 million (CSO, <https://www.cso.ie/en/releasesandpublications/ep/p-pme/populationandmigrationestimatesapril2021/mainresults/>)

Death Rate in 2021 per 1,000 = 6.81. This is the highest death rate in over 20 years. The deaths in 2021 have reversed a declining rate of deaths over the last 20 years. This sudden rise in deaths and the death rate is continuing into 2022.

Shocking Covid Vaccine Trial data exposing dangers and ineffectiveness of covid vaccines

The Pfizer Inoculations Do More Harm Than Good. Pfizer's own 6 month report data on its COVID-19 inoculation shows that greater illness and death in the inoculation arm than the placebo arm. Plus, poor trial design, missing data, underpowered studies, fraud, passive surveillance and more. The **Absolute Risk Reduction (ARR)** and **All Cause Mortality for the covid vaccines** and the **Excess Mortality for covid vaccinated population** are the key measures. The data and evidence from around the world in 2021 and 2022 show that these risks and mortality are very high, too high. Links to Pfizer trial data below.

The Fraudulent and False 95% Efficacy rate or Effectiveness rate for Pfizer covid vaccine and other covid vaccines

**Vaccines and Related Biological Products Advisory Committee Meeting
December 10, 2020**

In a mid-November analysis of **36,621** participants randomized 1:1 to vaccine or placebo ... efficacy in preventing confirmed COVID-19 occurring at least 7 days after the second dose of vaccine was 95.0%, with **8 COVID-19 cases in the vaccine group and 162 COVID-19 cases in the placebo group.**

The Calculation of Relative Risk Reduction – the one used by Pfizer and other vaccine companies

RELATIVE RISK

$$8 \div 18310 = 0.00044$$

$$162 \div 18310 = 0.00885$$

$$0.00044 \div 0.00885 = 0.0049$$

$$100 \times (1 - 0.0049) = 95\%$$

The Calculation of Absolute Risk Reduction – the most accurate way to measure and assess vaccine effectiveness

ABSOLUTE RISK REDUCTION

$$8 \div 18310 = 0.00044$$

$$162 \div 18310 = 0.00885$$

$$0.00885 - 0.00044 = 0.00841$$

$$100 \times 0.00841 = 0.8\%$$

The **Absolute Risk Reduction** is 0.8% and this is the most accurate way of measuring vaccine effectiveness. This risk reduction of 0.8% is insignificant and does not offer significant protection. Furthermore new variants are resistant to these vaccines making the Absolute Risk Reduction 0 or zero. This does not justify vaccine passports and mandatory vaccines in scientific terms and legal terms.

Scientists find Toxins and Dangerous Particles, Nanochips and Nano-transmitters in the covid vaccines and boosters. No Informed Consent given for this by vaccinated people. Lives put in danger.

The Role of the Lockstep Document published by the Rockefeller Foundation in 2010 in persuading governments to introduce lockdowns and other totalitarian measures, including in Ireland

The infamous Lockstep document, titled 'Scenarios for the Future of Technology and International Development' published by the Rockefeller Foundation in 2010 provided the policies and measures for implementing lockdowns, censorship, the psychological manipulation and Mass formation, the vaccine mandates and apartheid, quarantine camps, etc. and the coordination of such internationally which were followed by political leaders, "government health advisors", the WHO and the WEF and breached the Constitutions, Laws and Human rights of many nations and breached scientific and medical principles and practices. More Corroborating Evidence that the Omicron variant of covid19 is less serious than the Delta variant and does not justify Lockdowns, Business Closures, and other social restrictions which are causing massive damage to businesses, the economy, families, communities and society. More evidence of Psychological Manipulation and Mass Formation and Corruption.

The Omicron variant has been proven to be far less serious than the Delta variant. The evidence and testimonies of top medical doctors and scientists continues to show that early treatment using effective and safe medicines available since April 2020 and the use of them as preventatives and prophylactics can treat and cure the Omicron variant, the Delta variant and all of the other variants of covid19, enabling patients to recover and develop life-long natural immunity to the virus. These treatments are unlawfully banned and blocked in Ireland and several other countries so that vaccines and boosters can be marketed and sold by politicians and their "advisors" and those following orders from them.

More Evidence of the Ineffectiveness of Lockdowns and other social restrictions against covid19

Psychological Manipulation and Mass Formation techniques used by some governments on their peoples (including in Ireland) have conditioned most people to believe that Lockdowns are the best solution and the only solution. The evidence presented in our books of evidence show that this belief is wrong, counter-productive, ineffective, socially destructive, criminally dangerous, and unjustified in scientific, medical and legal terms. Here is another study from Stanford University to support our evidence.

More Evidence showing strong financial incentives to label patients with other illnesses and diseases as “covid19”. The Association of American Physicians and Surgeons has confirmed this. The NIH and CDC mentioned in this have significant influence over NPHET and the HSE in Ireland.

AJ Depriest and the Tennessee Liberty Network carried out investigations into the financial incentives offered to hospitals all over the USA to label all patients and deaths as “covid19” regardless of primary illness or disease or if accidents were involved. These incentives are over \$100,000 per patient. These financial incentives are in the CARES act passed in 2020. It is causing covid19 numbers to be greatly exaggerated and over counted for financial gain and profit. This corroborates earlier findings presented in our prior books of evidence. The Association of American Physicians and Surgeons have confirmed the nefarious and dangerous effects of these financial incentives. This is one of the main reasons for the massive number of covid19 case numbers, hospitalizations and deaths in the USA. And this has an effect on other countries including Ireland spreading mass fear and panic and an increase in the demand for lockdowns, business closures, and experimental, unsafe and mostly ineffective covid vaccines. Vast criminal destruction of the economy and of society.

‘In ventilated patients, the death toll is staggering. A National Library of Medicine January 2021 report of 69 studies involving more than 57,000 patients concluded that fatality rates were 45 percent in COVID-19 patients receiving invasive mechanical ventilation, increasing to 84 percent in older patients. Renz announced at a [Truth for Health Foundation Press Conference](#) that CMS data showed that in Texas hospitals, 84.9% percent of all patients died after more than 96 hours on a ventilator.

‘Then there are deaths from restrictions on effective treatments for hospitalized patients. Renz and a team of

data analysts have estimated that more than 800,000 deaths in America's hospitals, in COVID-19 and other patients, have been caused by approaches restricting fluids, nutrition, antibiotics, effective antivirals, anti-inflammatories, and therapeutic doses of anti-coagulants.

Request for Police and Military Investigations of Conflicts of Interest of all NPHET members

In January 2022, it was reported in the press that NPHET which is controlling the Irish government are considering imposing mandatory vaccines on the Irish population. This is criminal and an outrageous abuse of the Constitutional and human rights of the Irish people and nation. News article at <https://www.breakingnews.ie/ireland/covid-nphet-to-consider-mandatory-vaccines-as-ministers-anxious-to-ease-hospitality-restrictions-1240020.html>

Conflicts of interest have been identified in SAGE in Britain and in the NIH in the USA in relation to covid19 policies. Vast profits and fortunes have been made. This was detailed in prior books of evidence. In consideration of the bizarre and anti scientific and anti medicine and anti data policies proposed by NPHET and imposed by them and the government and HSE on the Irish people and nation in 2020, 2021 and 2022, the conflicts of interest of all NPHET members and their families and relations and Dr. Luke O Neill need to be thoroughly investigated to establish the conflicts of interest which exist and existed. This includes all types of payments to them here in Ireland and through foreign offshore accounts over the last 10 years by Big Pharma, the Gates Foundation, GAVI, WEF, and the Wellcome Trust which have profited from covid19 and the PPE, contact tracing and vaccines and boosters.

UnLawful and Illegal Experimentation on People without their Informed Consent (mentioned earlier in the document) and without revealing that placebos exist and experiments are taking place

The Irish public have not been informed by the government or NPHET or the CMO or the censored media that a mass experiment is taking place on them. Most people who took the vaccines did not know about this experiment and that placebos are being used. Some of the placebos contain experimental treatments for meningitis and other diseases. Placebos should contain saline solutions or harmless ingredients not more experiments on people ! This breaches experiment guidelines and laws.

Here are some news articles about this fact

More Lies and Frauds Exposed about the covid vaccines

On January 11th 2022 Mr. Bourla CEO of Pfizer admitted on live television in the USA that the 2 Pfizer covid vaccines were ineffective against covid19 and his contradicted his statements in December 2020 and Spring 2021 that the vaccines were over 95% effective. This corroborates and proves our evidence supplied to the gardai (Irish police) and DPP since May 7 2021. The boosters contain the same ingredients as the vaccines and have the same type of ineffectiveness. The evidence also shows that the other covid vaccines are similarly ineffective. Lies and criminal fraud are taking place and causing financial losses and endangering lives and this criminality is being enforced via vaccine passports and mandates and discrimination and apartheid in society.

Murder and manslaughter Charges against those responsible for

(i) depriving covid19 patients of early treatment with safe and effective medicines since April 2020

(ii) depriving covid19 patients of use of these same safe and effective medicines as preventatives or prophylactics to prevent covid19 infection in vulnerable people and in the general population

(iii) killing patients with high pressure ventilators and the drug Remdesivir

(iv) Lockdowns and the cancellation of many thousands of hospital appointments for cancers, heart diseases, respiratory diseases, liver diseases etc. and the deaths of many people due to this

(v) giving experimental covid vaccines and boosters to people without their informed consent including not telling them about the dangerous ingredients in them and the dangerous batches, and the deaths and injuries and disabilities caused by the vaccines and boosters. Continuing to give these dangerous vaccines and boosters to people while knowing they were causing mass deaths and injuries and disabilities worldwide

The scientific and medical evidence presented in the books of evidence and the testimonies of top medical doctors and research scientists who have successfully treated covid19 patients worldwide clearly show there were safe and effective treatments for covid19 since April 2020 and these should have been used for early treatment and also as preventatives and prophylactics. And that 70% to 100% of covid19 deaths could have been prevented in 2020 and 2021, though it should be noted that over 90% of covid19 patients had 2 or more serious underlying illnesses, eg. cancers, heart diseases, chronic illnesses, etc. and would have died from these in 2020 and 2021. The evidence shows many other illnesses, diseases and accidents were mislabelled as “covid19” so as to create mass fear and panic. The people who could have been saved were denied these essential medicines and this was deliberate and for the purpose of creating false desperation and selling hastily developed experimental covid vaccines and boosters in 2021 and into 2022. This is the crime of murder or manslaughter.

Secondly, the mass deaths from the experimental covid vaccines and boosters are well documented in the books of evidence and the existence of certain dangerous batches of vaccine which killed or seriously injured some vaccinated people while other batches were harmless and did nothing biologically points to illegal experimentation on people and to criminal intent and to premeditated manslaughter or murder. The injuries and disabilities caused constitute attempted murder or manslaughter, assault causing serious harm, the crime of poisoning and medical negligence. These are crimes which must be prosecuted in the criminal courts in Ireland and several other countries and also prosecuted in the International Criminal Court using the same rules as the Nuremberg trials of 1946.

More Evidence of Fraud

Under current government and HSE guidelines a person is not fully vaccinated until 2 weeks after the 2nd vaccination and 7 days after the 2nd Pfizer vaccination. If a person dies or catches a covid19 infection within that period they are classified as “unvaccinated”. Recently this has been changed to 2 weeks after receiving the booster injection. And this too will be changed once the second booster comes out, and this is already the case in Israel. And third and fourth boosters are on the way. In the past, and for many decades, a person was classified as “vaccinated” once he or she received the vaccine, normally within 24 hours of getting it. This data manipulation and fraud in relation to covid vaccines and boosters needs to be exposed in courts and to the general public.

News from Good Morning America and ABC news, December 29 2021.

“ The newly updated CDC guidelines don't require testing at the end of isolation because PCR tests can stay positive for up to 12 weeks, CDC Director Dr. Rochelle Walensky told "Good Morning America" Wednesday."So we would have people in isolation for a very long time if we were relying on PCRs," Walensky said.”

and The CDC has withdrawn the PCR test at this stage and stated last week that it produces a positive result for up to 12 weeks, and so is not fit for purpose. The CDC has also made no distinction between the jabbed and vaccine free in their recent isolation guidelines. As CNBC reported. The U.S. Centers for Disease Control and Prevention amended its controversial Covid-19 isolation guidance on Tuesday, declining to add a testing requirement as public health officials

expected, after the agency cut its recommended quarantine time in half. The piece stated that, in its updated guidance, the CDC has confirmed that people who have recovered from the virus and have isolated for at least five days, do not have to take an antigen test. The updated guidance comes after the CDC faced a barrage of criticism last week for shortening its recommended isolation period from 10 days without asking for people to get tested.

The CDC is full of contradictions, constantly changing its stance and sowing confusion in relation to covid19.
